

SettleIT™

POWERED BY INFOTRACK

Your trusted one-stop solution for all property matters

SettleIT for Banking

SettleIT for Banking is the go-to platform for all your property settlement and lodgment needs. Operating as an incorporated legal practice, SettleIT eases the burden on Electronic Lodgment Network Operator (ELNO) teams internally, whilst also offering transparency, efficiency, and peace of mind throughout the settlement process.

Why use SettleIT for Banking?

All ELNO platform administration managed.

Communication with vendors, purchasers, solicitors or conveyancers handled.

Bypass ELNO training and rely on SettleIT's experienced agents.

Intuitive and easy-to-use platform.

Full visibility of the settlement process.

Support across most Australian jurisdictions.

How does SettleIT for Banking work?

1. Create a SettleIT Banking order and upload the required documents.
2. Sit back and let SettleIT Banking create or join the ELNO workspace, prepare the electronic mortgage, liaise with all parties, settle the matter, disburse funds and register the transfer and mortgage documents.
3. Receive status updates and track your Settlement in the SettleIT platform. You will be notified immediately once settlement occurs in the ELNO workspace and all relevant documents will be returned for your records.
